SMALL ANIMAL DENTISTRY

Prior to the 1980's, veterinary dentistry was an almost invisible service, plus few clinics in the USA were solely devoted to this practice. Over the past 30 years, this section of veterinary medicine has expanded from its beginning of continuing education courses to veterinary dentistry curricula offered in schools of veterinary medicine. That, in combination with animal owner education programs such as the Pet's Need Dental Care, Too? Campaign, has helped grow this integral part of veterinary medicine.

Offered two times, two locations:
