

State of the VDL and Emerging Diseases
Patrick Roady, DVM, MS, DACVP

Learning Objectives:

1. Appreciate the overall caseload and status of the VDL.
2. Learn of any new and developing tests.
3. Understand the VDL's role in emerging diseases as well as the COVID-19 pandemic.

The University of Illinois Veterinary Diagnostic Laboratory (VDL) has been growing substantially and continues to offer new testing modalities. It also has an active role in monitoring/diagnosing emerging diseases, and has and continues to play a major role during the COVID-19 pandemic.

As this informative talk is regarding dynamic and constantly changing statistics, current and real-time information will be conveyed.
