

## **Abstract for RACE Program**

**Program Title: Tam's test result-Lyme borreliosis in dogs and cats**

### **Program Description:**

This case-based session will summarize key aspects of Lyme borreliosis in dogs and cats and provide resources for practical clinical management. Recent peer-reviewed literature, and evidence- and expert-based guidelines, will be discussed.

By the end of the session participants should feel comfortable and confident facing off against this common infectious disease, and well-equipped with expert- and evidence-based resources to assist with case management, prevention, and pet-owner communication, along with addressing One Health concerns.

### **Program Agenda:**

1. Provision of evidence- and expert-based guidelines, resources, and communication tools
2. Case example to highlight incorporation of resources into practical clinical Lyme borreliosis management and prevention
3. Discussion of recent peer-reviewed literature

### **Learning Objectives:**

1. Learning outcomes: The session will focus on the following key outcomes:
  - a. Lyme borreliosis evidence- and expert-based management
  - b. One Health
  - c. Preventive care
2. Learning objectives: By the end of the session attendees will:
  - a. Recall Evidence- and expert-based guidelines in dogs and cats for:
    - i. Lyme borreliosis management
    - ii. Preventive care
  - b. Feel updated on:
    - i. Recent information on Lyme risk (endemic, emerging), consensus guidelines
  - c. Understand & apply resources, communication tools
