

KEEP YOUR PET HEALTHY!

HEALTHY WEIGHT

Just as important as our own health, it's equally important to maintain a pet's healthy weight. Being overweight can reduce your pet's life expectancy by more than two years and overall negatively affect their quality of life!

WHAT IS BODY CONDITION SCORING?

BCS is a method of evaluating body fat in animals. It measures level of fat covering ribs, definition of the waist and abdominal tuck.

WHY IS BCS IMPORTANT?

Maintaining a healthy body condition can help prevent disease associated with obesity, including arthritis, diabetes and high blood pressure.

MAINTAINING HEALTHY BODY CONDITION

Keep your pet active! Talk with your veterinarian about nutrition and calorie intake. Keep treats to a minimum and reach for healthy options.
